DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US 5,569,181 to Heilman et al.

In the specification and figures, Heilman discloses a fluid delivery system with a mixing unit 20 with two intake ports that are connected to feeders 10, 11, a discharge port that is capable of being connected to an outflow device, wherein the mixing unit comprises a hollow body with static helical mixing vanes therein in order to allow the mixing and passage of fluid therethrough. See FIG 1, column 3, lines 45-67) and FIG reproduced below.

FIG. 1

3. Claims 2, 3, and 5-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose or suggest the device claimed by applicant. In particular, the prior art fails to disclose a mixing device with the claimed intake and discharge ports, helical mixing duct, in combination with an air vent or a 3-way valve at the intake ports.

Art Unit: 3761

The best prior art of record, US 5,569,181 to Heilman, discloses a mixing chamber with the intake and outflow ports and helical mixing vane, but does not disclose or suggest an air vent or three-way valves. US 3,677,248 to McPhee discloses a mixing chamber with multiple intake ports, a discharge port, an air vent, and three-way valves, but does not disclose a helical mixing duct. Neither reference provides motivation to combine the two disclosures, rendering the instantly claimed device patentable over the art of record.

Response to Arguments

5. Applicant's amendment and arguments filed 1 June 2006 have been entered and considered.
6. Applicant's claim to representative capacity under 37 CFR 1.34 and the respective address change is noted.
7. Applicant's arguments with regard to the 35 USC 112 rejections are persuasive. Accordingly, the rejections have been withdrawn.
8. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
